

Elena Altieri et al. (754) introduce this month's theme on the use of behavioural science in health. Tedros Adhanom Ghebreyesus (755) provides an overview of the ways in which behavioural science can be applied.

Gary Humphreys (758–759) reports on systemic approaches to safer roads. Joyce Wamoyi talks to Andréia Azevedo Soares (760–761) about attributes of behaviour change initiatives in sub-Saharan Africa.

## Community health worker outcomes

Thomas Gadsden et al. (805–818) review the evidence for performance-based incentives.

## Behavioural and social science

Maria A Carrasco et al. (834–836) outline research opportunities.

## Tailoring interventions

Robin Schimmelpfennig et al. (819–827) promote behavioural change for health.

## Malaria control

April Monroe et al. (837–839) study the intersection of behaviour and control efforts.

## Behavioural change theories

Rajiv N Rimal & Maria Knight Lapinski (828–833) describe a conceptual approach to the field.
